GENUINE SAUNA & STEAM

HELO ROXX

HELO ROXX

SOFT STEAM, BEAUTIFUL DESIGN

Helo Roxx unites modern industrial design with a large amount of natural stone. This impressive brushed steel design heater produces enjoyable soft-heated steam or *löyly**. Heat is stored efficiently in the stones, making Helo Roxx a favorite for löyly lovers. When water is thrown onto the nearly 40 kilos of stones, it produces pleasant and smoothly soft steam.

Helo Roxx can be installed on the floor or integrated into the structure. Helo Roxx stands on its own feet, adjustable for the slope of the sauna floor. For additional security, the heater is braced to the wall. Helo Roxx heaters are suitable for saunas with a capacity of 5-13 m³.

Helo Roxx has a built-in electronics motherboard, so you can choose between several controller options: Helo Easy, Helo Midi, and Helo Digi I or II. The control unit precisely manages, for instance, the timing and temperature of the heater. Depending on the model, the remote control unit can be placed in the sauna or outside.

Helo Roxx weighs 12.7 kg and the recommended amount of heater stones is 35-40 kg.

* Löyly is the Finnish word for the heated high-humidity air created when a ladle of water is thrown onto the hot stones.

TYPE	POWER (kW)	SAUNA SIZE (m ³)	MINIMUM DISTANCES (mm) side / front* / ceiling
HELO ROXX 60	6.0	5.0-10.0	100 / 300 / 1070
HELO ROXX 90	9.0	9.0-13.0	100 / 350 / 1070

*10 mm minimum distance up to 450 mm from floor

WIDTH (mm)	HEIGHT (mm)	DEPTH (mm)
490	830	250
