

HARVIA

Sauna & Spa

HARVIA FORTE
- a sauna always at your service

JUST GRAB A TOWEL, LIFT THE FORTE'S COVER AND CLIMB ONTO THE BENCH TO ENJOY HUMID AND GENTLE STEAM.

Harvia's always-ready Forte electric sauna heater is a perfect choice for those who use the sauna frequently and want to enjoy the heat immediately. Forget the hustle and bustle of everyday life and enjoy the health benefits of going to sauna anytime you want. All you need to do is lift the cover, throw water on the hot stones and enjoy the pleasant sauna experience offered by the Forte heater. With the Forte heater, you can have an extremely humid sauna or a hotter and drier sauna – whatever you like.

The modern exterior of Harvia Forte hides a thermally insulated stone space that keeps the stones hot. Thanks to its round shape and cool exterior surface, the heater is always safe for sauna-goers of all sizes and ages. The Forte heater is always in energy-saving mode when it is not being used. You can release the heat energy stored by the stone space quickly and enhance the effect by throwing water on the stones. Taking a sauna is easy as the heater is always ready.

The heater can be controlled accurately to always ensure a pleasant sauna experience. Harvia Forte's digital Harvia Xafir control panel allows you to control the heater's features and energy consumption, for example. The control panel can also be installed inside the sauna. The control panel informs you if you have left the cover of the heater open and turns the heater off.

Harvia Forte is an excellent choice for private saunas and persons who like to take a sauna several times a week. The effective thermal insulation keeps the stone space warm, and when the heater is in the energy-saving mode, the heater functions as a sauna radiator and no energy goes to waste.

FORTE
Steel

- ✓ Your sauna is ready just by opening the heater cover
- ✓ The large amount of stones (100 kg) that is heat-insulated always guarantees an excellent sauna experience
- ✓ Safe and easy-to-use solution for family saunas, gyms and wherever people go in the sauna several times a week

1. Large, heat-insulated space for 100 kg of stones, kept at the desired temperature with heating elements and control electronics.
2. The bottom of the stove has a vent for supply air once the heater cover is opened.
3. The heat-insulated outer layer stores the heat of the stone space, keeping the exterior surface cool, although the internal temperature may be almost 300 degrees Celsius.
4. The heater cover insulates the top part of the stone space. Opening the heater cover releases the large amount of energy stored in the stones, and you can start bathing right away.

Model	Power kW	Recommended sauna room size min.-max. m ³	Sauna room height min. mm	Stone capacity max. kg	Dimensions width x depth x height	Weight kg
